RM 60 THE QUICK SET-UP SOLUTION
GREAT DIMENSIONS, HIGH VERSATILITY

RM 60

THE QUICK SET-UP SOLUTION

GREAT DIMENSIONS, HIGH VERSATILITY

Outstanding performance achieves high capacity continuity

The RM 60 is the most compact RM crusher and is suitable for newcomers as well as users looking for a maximum capacity of 80 t/h. Instead of being burdened with high costs, mobile recycling and handling of natural rock with existing plant equipment and personnel can bring additional value while doing away with transport, storage and purchasing costs.

The RM 60 is transported rapidly using a hook lift truck and is soon ready for operation. The crusher unit is easy to operate and all service work can be carried out from the ground. With high-performance components such as pre-screens and final screens, you can create a complete recycling centre incorporating clearly defined, cost-effective recycling systems.

RUBBLE MASTER dealerships will be pleased to discuss optimum settings and your construction site logistics.

HIGHLIGHTS

THE TECHNICAL HIGHLIGHTS

RUBBLE MASTER compact crushers are the compact class in mobile processing and are versatile, powerful and stable in value. They produce high-quality cubic value grain from construction debris and natural rock cost effectively and on-site.

Thanks to their compact design and low weight, they can be transported without any special permits. Proven technology and personal consultation are part of RM Lifetime Support and enable business operators to offer mobile recycling and natural rock processing cost-effectively as a high quality and profitable line of business. We are only satisfied when our customers are successful!

Feeding belt on/off, feeding belt speed slow/fast, feeding belt reverse, machine stop, optional: release system.

Appreciated by local residents: thanks to series dust suppression and noise reducing cover.

Straightforward handling: fed with small construction loaders (loading edge 1930 mm), remote control optimal.

Indispensable: release system to remove blockages, plus reliable magnetic separator.

Efficient: automatic 2-step conveying and diesel/electric drive.

Less wear thanks to pre-screening: the robust VS60 – also available with side conveyor belt – separates fines from the feed material.

Profitable niche business: production waste is graded by the container-mobile RM CS2500 and reused cost-effectively.

Includes hoist for changing the hammers safely.

Straightforward transport

DATA

RM 60 – HOOK-LIFT IMPACT CRUSHER

Output	up to 80 t/h, depending on material
Feed material size	diameter max. 500 mm
Inlet opening	640 x 550 mm
Crusher unit	RUBBLE MASTER impact crusher with 2 or 4 hammers Kinematics mechanically adjustable for primary or secondary crushing mode
Operation	Straighforward handling with remote control (optional)
Feed unit	Feed hopper 1 m³, The hopper is a solid, reinforced steel structure. Loading height 1,930 mm, loading width 1,860 mm, conveyor hopper width 640 mm Feed control system (Automation I Generation) for automatic crusher load-dependent conveying
Discharge belt	Folding conveyor 650 mm wide, cranked mechanically into transport position, discharge height 1,940 mm
Power unit	Deutz diesel engine, 4 cylinder, 67 kW at 2,000 rpm, TIER 3a/COM IIIa, approved, synchronous generator 19 kVA 400 V, electrical outlets 230 V and 400 V or external drives up to 6kW
Magnetic separator	Ultra-strong magnet, belt width 650 mm
Emission protection	RUBBLE MASTER Enviro concept: Dust suppression using water spray inside crusher
Transport system	Hook unit on truck
Weight	12,000 kg
Options	Release system to remove blockages inside crusher Remote control Diesel filling pump Crusher hammer changing system Hydraulic legs All electric drive

FIELDS OF APPLICATION

WIDE RANGE OF APPLICATIONS

Unique crusher design with excellent final aggregate quality
The new release system ensures even more homogeneous final aggregate in regular operation and the reliable swinging out of the impact plate when non-crushable materials enter. The crusher is designed so that the impact plates can be exchanged within a short time.

RUBBLE MASTER

WELCOME! TO OUR WORLD

RUBBLE MASTER is the competent partner at your side. We offer you more than innovative machines that are lasting in value – we offer you RUBBLE MASTER Lifetime Support:

TRAINING PROGRAMMES

We support you with structured training programmes which meet your requirements and turn operators into specialists.

CONTINUOUS ON-SITE SUPPORT

We offer you permanent on-site support through our partners so you can work with maximum efficiency and productivity at all times.

SITE ORGANISATION SUPPORT

Based on our many years of experience we, working together with you, optimise the design and settings of the machine and site logistics, which ensures you save costs.

SPARE PARTS SERVICE

The fast supply of high-quality original RUBBLE MASTER spares and wear parts reflects our commitment to service. Plus it optimises the availability of your machines at the same time.

RUBBLE MASTER SERVICE CENTRE

Our RUBBLE MASTER SERVICE CENTRE in Linz offers you even greater service expertise and the unrivalled quality of the manufacturer service.

RM Headquarters

“ Processing mineral materials is more than business to us, it is a way of life. ”

GERALD HANISCH,
RUBBLE MASTER
FOUNDER & CEO

We are committed to the innovative spirit to be able to offer you products and services at all times which improve your daily business in a lasting way. This passion is your guarantee for machines which fulfil your requirements in every respect. Implemented by a team of experts who are at your side as strong, reliable and always professional partners.
