ABOUT: Ryedale Organics was established in the 1930s by Maurice Kemp on an 11-acre field in Yorkshire. The site now operates on a very different scale, combining an arable farm, poultry unit, cold store facility and a fully licensed in-vessel composting operation, specialising in recycling food and green waste from local authorities, including Hull & East Riding, Manchester and Wigan.

A family-owned business with four members of the family involved on a day to day basis. They are constantly looking to improve and evolve their services, investing in new technology, upgrading plant and machinery, ensuring that their customers have more choice, offering increased capacity as the business evolves into a greener, cleaner, future.

MACHINE HISTORY:

3 x Hyundai HL960XT Wheeled Loaders –
Delivered between May 2018
and September 2019

**EXPECTED ANNUAL MACHINE
OPERATIONAL HOURS: 2,000**

MACHINE APPLICATION:

Operating five days per week handling upwards of 100,000 tonnes pa of local authority waste. The composting process requires multiple movements per tonne from the wheeled loaders.

**REASON FOR BUYING:**

"Following extensive market research the Hyundai wheeled loader best fit our site restrictions (space and weight) whilst maximising lifting capacity through bespoke bucket extensions, increasing efficiency per waste movement around the composting process.

WHY TAYLOR & BRAITHWAITE:

"Our first Hyundai wheeled loader was purchased over seven years ago from the then Yorkshire Hyundai Dealer EP Industries. Having taken over the area dealership in 2018, Taylor & Braithwaite were very quick to demonstrate their professional support of our existing equipment, therefore it was a very easy decision to place our latest orders with them."

AFTER SALES SUPPORT:

"The team at Taylor and Braithwaite are very quick to respond to our service requirements, always trying to exceed our expectations with a flexible approach to call outs. The telephone support is very knowledgeable, not being passed from person to person to get information is very reassuring. They obviously understand the technicalities of the machines they support. The one major issue we had (casting fault) was passed and resolved very quickly by Hyundai"
