1 x Hyundai HL960HDXT Wheeled Loader

EXPECTED ANNUAL MACHINE OPERATIONAL HOURS:

Trommels: 2,200
Wheeled Loader: 2,750

ABOUT: Wheeldon Brothers Waste Ltd

is an independent, family run business established for over 60 years and operates from four material recycling facilities around Manchester.

They recycle waste from the industrial, commercial and domestic sectors including builders, restaurants, shops, demolition, construction, manufacturing and local authorities.

Employing over 100 staff, and with a fleet of over 30 trucks, 15 excavators and 10 wheeled loaders, Wheeldon Brothers process upwards of 200,000 tonnes of waste per annum across eight picking lines. Following several waste processing techniques a large percentage of the waste is turned into SRF (solid recovered fuel) and is transported to controlled burning sites to produce energy, significantly reducing landfill waste.

MACHINE APPLICATION:

Waste processing and recycling, operating for upto 12 hours per day, five and a half days per week.

**REASON FOR BUYING:**

Wheeled Loader: "Having experienced mixed issues with our current fleet of wheeled loaders, we researched the market for suitable alternatives. Following extensive trials the Hyundai machine performed very well compared to our existing fleet with the added advantage of Cummins engines, which are extremely reliable, and ZF transmission. Price was also very important."

Trommels: "We were looking to get more out of the waste product and had a requirement for screening large volumes of waste for 20/40mm soil and aggregate."

WHY TAYLOR & BRAITHWAITE:

"In the first instance we had a personnel recommendation from Rick Allen at North West Recycling and Brampton Skip Hire Ltd. Rick advised that Taylor and Braithwaite not only advised and supported you through the initial purchase, but were very strong on their after sales service and support. Our experience was exactly the same when purchasing our first Pronar Trommel. We therefore had no hesitation in purchasing a replacement wheeled loader with the Hyundai HL960."

AFTER SALES SUPPORT:

"The after sales service from Taylor & Braithwaite has been excellent. Initial hydraulic problems with the wheeled loader was resolved very quickly, their service team responded and were on site the same day to fault find and repair the issue."
